

# CTVR: The Telecommunications Research Centre

## Project Description

CTVR conducts the research that will underpin telecommunications networks of the future, ranging from new photonics devices to cognitive radio networks. CTVR is a multi-site, multi-disciplinary centre, led by Trinity College Dublin. 4C's role includes collaborative decision support for cooperating autonomous wireless networks, and optimisation in the design of future optical network architectures.

## Project Coordinators

Dr. Ken Brown and Dr. Barry O'Sullivan

## Project Collaborators

TCD, Tyndall, NUIM, UL, DIT, DCU, and multiple industrial partners.

Science Foundation Ireland
