

# Network Embedded Systems

## Project Description

NEMBES will investigate a "whole system" approach to the design and operation of networked embedded systems, marrying expertise in hardware, software and networking with the design and management of built environments.

NEMBES is led by CIT, and involves partners from academia and the public sector across Ireland.

## Project Coordinators

Prof. Cormac Sreenan, Prof. Eugene C. Freuder and Dr. Ken Brown

## Project Partners

Cork Institute of Technology (lead), UCC Civil Engineering, UCC Centre for Architectural Education, Tyndall National Institute, Trinity College Dublin, University College Dublin, Cork University Hospital, Cork City Council
