

Advanced Meeting Scheduler for Google Calendar

Project Description

4C has been awarded by the Google Research Awards Program to conduct the research in the area of automatic event scheduling. This research concentrates on the development of an Advanced Meeting Scheduler that diagnoses conflicts between different business meetings and personal events, resolves the conflicts by recommending feasible meeting times and places while satisfying resource availability constraints based on real-world information coming from Google Calendars, Facebook, and other social utilities.

Project Coordinator

Dr. Jacob Feldman and Prof. Eugene C. Freuder
