

STOPP/START

Project Description

To develop a commercially-viable intelligent decision support system that will aid physicians to choose appropriately indicated and safe medicines for use in their elderly patients. The project combines constraint-based reasoning and software development with clinical development and validation of the Stopp/Start criteria by geriatricians and pharmacists at CUH and UCC.

Project Coordinator

Dr. Ken Brown

Project Partners

Dr. Denis O'Mahony (CUH), Dr. Stephen Byrne (UCC) & Prof. Cormac Sreenan (UCC)
